Pitch Option 1

As a CFO, accurate data is essential for reliable financial reporting and strategic decision-making. BiG EVAL automates data testing and validation, ensuring your financial data is accurate and compliant. The software platform supports auditability, providing clear and traceable data validation processes across databases and flat files like CSV or Excel. By reducing errors and enhancing the reliability of financial reports, BiG EVAL saves you time and resources during audits and improves audit readiness. Additionally, BiG EVAL can support predictive analytics and financial forecasting by ensuring high-quality data and integrates seamlessly with your FP&A tools for further cost savings.

Estimated Time: ~40 seconds

Pitch Option 2

Financial integrity is critical for strategic planning. BiG EVAL offers an automated solution for comprehensive data quality checks, integrating with various data sources and supporting auditability. The software's technology-agnostic approach handles databases and flat files, ensuring data accuracy, compliance, and traceable validation processes. With scalable capabilities, BiG EVAL allows you to confidently manage large volumes of financial data, enhancing compliance, and building the foundation for sound strategic decisions. The platform seamlessly integrates with your existing financial software and systems.

Estimated Time: ~40 seconds

Pitch Option 3

Accurate financial data is essential for your role. BiG EVAL automates the data validation process, ensuring your data is accurate, reliable, and compliant with industry regulations. The software platform supports diverse data sources, including flat files like CSV or Excel, with built-in auditability features for clear and transparent validation processes. By maintaining data integrity, BiG EVAL facilitates smoother financial reporting cycles based on reliable information. It helps you achieve financial accuracy and efficiency. The platform is user-friendly and provides comprehensive support for onboarding and training finance teams.
