Pitch Option 1

As a CIO, ensuring data integrity and compliance is crucial. BiG EVAL automates comprehensive data quality checks across your entire data pipeline and data at rest. The technology-agnostic platform supports all current data technologies, including databases, flat files and API sources. With massive scalability, end-to-end testing capabilities, and comprehensible test results, BiG EVAL integrates seamlessly with your existing systems. It streamlines operations, reduces risks, and enhances decision-making with real-time monitoring and alerts. This will allow you to focus your team on strategic growth and innovation rather than stressful firefighting. The platform is user-friendly and comes with comprehensive support during the implementation phase.

Estimated Time: ~40 seconds

Pitch Option 2

As a CIO, reliable data is key to driving strategic initiatives. BiG EVAL offers an all-in-one solution for automated data testing and validation in live environments but also during the development cycle of data products. The BiG EVAL platform supports diverse data sources and integrates seamlessly with your tech stack. The platform ensures data integrity with massive scalability, robust testing, continuous compliance monitoring, and comprehensive historization of test cases. This enables you to confidently manage data quality, reduce operational costs, and improve efficiency in supporting your organization's goals. BiG EVAL adapts to future technological changes, ensuring long-term viability.

Estimated Time: ~40 seconds

Pitch Option 3

Data accuracy and security are critical for your organization. BiG EVAL automates the data testing process, providing scalable and flexible solutions to ensure data integrity across various platforms. BiG EVAL's technology-agnostic approach supports all current data technologies, offering comprehensive testing, risk reduction, and detailed historization of test cases. BiG EVAL enhances collaboration across departments by providing a unified data quality solution, empowering your team to maintain high standards and drive technological advancements. The platform also supports regulatory compliance and industry standards.

Estimated Time: ~40 seconds
