

# PARTNER PoC GUIDE

**Data Quality & Data Test Automation** 

## Table of Contents

- Prospecting
  - Ideal Customer Profile
  - PoC Scenarios
  - Resources & Handouts
- PoC Details
  - PoC Process
  - PoC Possibilities
  - Who implements the PoC?
- Partner Center
  - Available resources
  - How to get access?

## Documents and other Resources

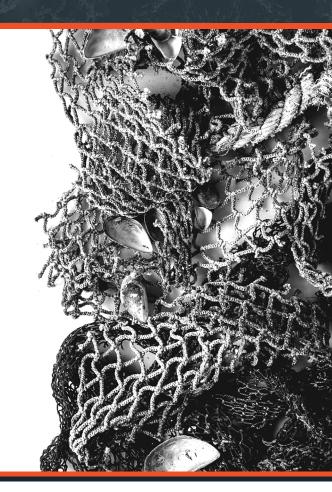

Whenever we reference a document within this guide, you can get that document by one of the following ways:

- Partner Center: You can download them from within our partner center.
  - → How to access the partner center
- **Download Link:** We provide you a download URL directly within this guide. That URL can be sent to the prospect/client.

The download is hosted on our HubSpot CRM, but we do not track the prospects opening these documents. Therefore, we do not ask for an email-address or other registration if prospects/clients intend to download these documents.

# Prospecting

How to find a PoC prospect/customer

## Ideal Customer Profile

#### Industry

- Finance
- Insurance
- Healthcare
- Manufacturing

#### Size

- •250+ employees
- Mid large

#### Typical Projects

- Data Warehouse Modernisation
- Automation
- Data Quality
- DataOps

#### Common Technologies in use

- WhereScape
- Microsoft SQL
- Microsoft Azure
- Snowflake
- Teradata
- •SAP
- Google BigQuery

#### Pain Points

- Manual Testing
- Data Quality Issues
- Implementation Issues
- Regulatory Compliance
- No trust by end users

#### Job Titles

- · Chief Data Officer
- Head of Data/Team Lead
- Date Engineer
- Data Architects
- · Data Stewards
- Regulatory People

## PoC Scenarios

Clients usually choose between one and three usage scenarios to be evaluated during a PoC:

## **Data Test Automation**

- Quality assurance in data-centric projects by test automation (Regression-, Unit-, Integration-, Performance-Testing):
  - Data Warehouse with ETL/ELT processes
  - Data Lakes
  - Data Analytics
  - Reporting
  - Business Applications (ERP, CRM)
  - · Data Migrations
- DevOps in data-centric projects: Automated testing within continuous integration or deployment processes (CI/CD).
   E.g. Azure DevOps, Jenkins or similar tools.
- Automating DataOps processes

# **Data Quality Assurance**

- Ongoing data validation and plausibility checking (monitoring).
- Receiving notifications if data errors are detected.
  - Notify technical staff to fix issues. Or creating service desk tickets.
  - Notify business experts (data stewards, data entry, application users)
- Preventing erroneous data from entering live systems (data integration; ETL/ELT).
- Fixing business processes that fail or are inefficient because of bad data.
- Automating manual data reconciliation or validation tasks.
- Triggering external processes to fix issues. Technical but also business processes like telling the right employee to fix a specific issue.

## Handouts and Resources for Prospects/Customers

- Website Link
  - https://bigeval.com
- Factsheets (Flyers)

We offer two different factsheets which can be handed out depending on the scenarios that may make sense for the specific prospect.

- BiG EVAL Data Quality Management https://hubs.ly/Q01QRqqD0
- BiG EVAL Data Test Automation https://hubs.lv/Q01QRgz60
- Introduction (Pitch Deck)

We usually use the pitch deck to introduce our solution combined with a personal demonstration. But the pitch deck is also self explaining and can be handed out to prospects as an introduction.

# PoC Details

## PoC Process

### Most PoC projects follow the following process:

# **Partner Selection** (optional)

#### • The customer selects an for the PoC.

#### Scenario(s) definition

• The customer specifies the requirements of the success criteria for the

#### Setup & Configuration

• The customer (or partner)

#### **Implementation**

implements the PoC

#### **Results Presentation**

• The customer (or partner)

**Decision & Procurement** 

2 Weeks

2 Weeks

## PoC Possibilities

The customer can choose between two different possibilities to perform the PoC:

#### Trial License

Customer installs BiG EVAL in own data center or cloud.

Preferred if client wants to evaluate with own data.

- 14 day trial license (full features available)
- Physically installed within customers data centre or cloud environment.
- Access to own data.
- Setup and Configuration needs to be done by customer or partner.
- No pre-configured data validation cases.

#### Sandbox

Customer gets access to a preconfigured virtual machine.

Preferred if client just wants to play around quickly with some demo data.

- 10 day access (full features available)
- Demos for all features and usage scenarios are preconfigured.
- Physically installed within BiG EVAL's cloud environment.
- No access to customers data for evaluation.
- Set up and prepared by BiG EVAL team; available on short-term.

## PoC Implementation

### The PoC can be implemented by different parties:

#### Customer

The customer implements the PoC by himself.

- Setup and configuration done by the customer.
- Implementation of data validation rules and test cases done by the customer.
- Full Support available

#### **Partner**

The customer commissions a BiG EVAL partner to implement the PoC.

- Customer chooses a BiG EVAL partner.
  - See our Partner Directory https://bigeval.com/partners/
  - Sometimes one of the BiG EVAL partners is already a contractor of the customer.
  - Or if a contractor intends to become a BiG EVAL partner we are happy to support.
- Individual arrangement with the BiG EVAL partner.

#### **BIG EVAL**

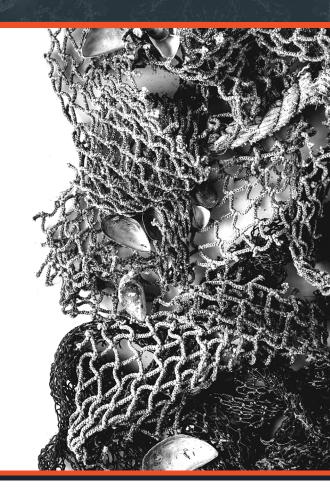

The customer commissions BiG EVAL to implement the PoC
